
TransTEx: Expression-Based Partitioning of the Transcriptome
Novel tissue specificity scoring method
IsoTumorEx: Solid Tumor Pan-Cancer Transcriptome
Cancer enriched and tissue enriched targets novel biomarkers in solid tumors
PGViS: Personal Genome Variant Interpretation Score
Allele frequency and variant interpretation of risk feature of DNA LLM to predict inherited risk of developing lung cancer
Unraveling the landscape of tissue specific gene regulation using AI
PhD Theme
Mammalian conservation of isoform expression groups
Patterns of conservation (divergent/conserved) at isoform-level
TSProm: Tissue specific Regulatory language
Built tissue specific language models for unraveling gene regulatory logic
